FORTIETH ANNUAL REPORT OF THE BOARD OF ACTUARIES OF THE CIVIL SERVICE RETIREMENT SYSTEM

LETTER

FROM

CHAIRMAN, UNITED STATES CIVIL SERVICE COMMISSION

TRANSMITTING

THE FORTIETH ANNUAL REPORT OF THE BOARD OF ACTUARIES OF THE CIVIL SERVICE RETIREMENT SYSTEM FOR THE FISCAL YEAR ENDED JUNE 30, 1960, PURSUANT TO THE CIVIL SERVICE RETIREMENT ACT

APRIL 2, 1962.—Referred to the Committee on Post Office and Civil Service and ordered to be printed

> U.S. GOVERNMENT PRINTING OFFICE WASHINGTON: 1962

72011

LETTER OF TRANSMITTAL

U.S. CIVIL SERVICE COMMISSION, Washington, D.C., March 30, 1962:

Hon. John W. McCormack, Speaker of the House of Representatives.

Dear Mr. Speaker: The Commission is pleased to send you herewith the 40th Annual Report of the Board of Actuaries of the Civil Service Retirement System for the fiscal year ended June 30, 1960, submitted in pursuance of section 16 of the Civil Service Retirement Act.

Act.

The report has also been sent to the President of the Senate.

Sincerely yours,

JOHN W. MACY, Jr., Chairman.

m

LETTER OF SUBMITTAL

NEW YORK, N.Y., March 9, 1962.

U.S. CIVIL SERVICE COMMISSION, Washington, D.C.

Dear Commissioners: The Board of Actuaries appointed under section 16(g) of the Civil Service Retirement Act has the honor to submit herewith its 40th annual report on the operation of the fund.

The report gives a statement of the Government appropriation necessary to finance the fund on the normal cost-plus-interest basis, under the benefit and contribution provisions of the act as amended to June 30, 1960, and on the basis of the estimated membership of the fund as of that date.

The Board wishes to record its great loss in the death of its member, Mr. Otto C. Richter, on February 17, 1962. The Board was most fortunate to have had the benefit of Mr. Richter's services in the preparation of the present report, having in fact, received his verbal approval of the report on the day preceding his death. As a result of the experience gained from his service as an actuary, the advice he was able to give was always of great help.
Respectfully submitted.

GEORGE B. BUCK, Jr., R. R. REAGH, Board of Actuaries, Civil Service Retirement System.

40TH ANNUAL REPORT OF THE BOARD OF ACTUARIES OF THE CIVIL SERVICE RETIREMENT SYSTEM

The civil service retirement and disability fund was established in 1920 to furnish retirement benefits to officers and employees of the U.S. Government who become superannuated in governmental service, or incapacitated before attaining old age. The Retirement Act makes provision for a Board of Actuaries of the Civil Service Retirement System and in section 16(g) defines the chief duties of the Board, as follows:

* * * to report annually upon the actuarial status of the system and to furnish its advice and opinion on matters referred to it by the Commission, and it shall have the authority to recommend to the Commission and to the Congress such changes as in the Board's judgment may be deemed necessary to protect the public interest and maintain the system upon a sound financial basis. The Commission shall keep or cause to be kept such records as it deems necessary for making periodic actuarial valuations of the Civil Service Retirement System, and the Board shall make such valuations at intervals of five years, or oftener if deemed necessary by the Commission. * * *

This report, which has been prepared as of June 30, 1960, is the 40th annual report of the Board of Actuaries. The report gives first a summary of the main benefit and contribution provisions of the act as amended during 1960. This summary is followed by an estimate of the present membership and a table showing the number and amount of annuities in force on June 30, 1960. The report next gives a discussion of the appropriation payable by the Government for the support of the fund. Statements giving the results of a valuation of the liabilities on account of annuities in force as of June 30, 1960, and the results of the mortality experience of annuitants for the past year are then submitted. In conclusion, the Board gives certain comments on the present operation of the fund.

SUMMARY OF BENEFIT AND CONTRIBUTION PROVISIONS OF THE CIVIL SERVICE RETIREMENT ACT

The following summary states the main benefit and contribution provisions of the Retirement Act currently in effect as they were interpreted by the Board of Actuaries. "Average salary" is used to denote the average annual basic salary received by the employee during any 5 consecutive years of creditable service which affords the highest average. "Lump-sum credit" means the unrefunded amount consisting of the retirement deductions made from the employee's basic salary; any sums deposited by the employee covering prior service; and interest on such deductions and deposits, at 4 percent per annum to December 31, 1947, and at 3 percent per annum thereafter, compounded annually to December 31, 1956, or, in the case of an employee who separates before he has 5 years of service, to the date of separation. The lump-sum credit does not include interest if the service covered thereby aggregates 1 year or less.

BENEFITS

Service retirement

Condition for eligibility. - Retirement is compulsory at age 70 after

15 years of service, with certain exceptions.

Retirement is permissible at the option of the employee at age 60 after 30 years of service or at age 62 after 5 years of service. A Member of Congress may retire at age 60 after 10 years of Member service.

At the option of the employee at age 55 after 30 years of service, or upon involuntary separation not due to misconduct or delinquency after 25 years of service, or after age 50 and 20 years of service, or upon separation from service of a Member of Congress other than by resignation or expulsion after age 50 and after having served in 9 Congresses, an immediate annuity is payable equal to the regular annuity reduced by one-twelfth of 1 percent for each full month not in excess of 60, and one-sixth of 1 percent for each full month in excess of 60 the employee is under age 60.

Amount of benefit.²—The annuity is equal to—

(1) The larger of-

(a) 1½ percent of the employee's average salary multiplied by so much of his total service as does not exceed 5 years; or

(b) 1 percent of the employee's average salary, plus \$25, multiplied by so much of his total service as does not exceed

5 years; plus
(2) The larger of—

(a) 1% percent of the employee's average salary multiplied by so much of his total service as exceeds 5 years but does not exceed 10 years; or

(b) 1 percent of the employee's average salary, plus \$25, multiplied by so much of his total service as exceeds 5 years

but does not exceed 10 years; plus

(3) The larger of-

(a) 2 percent of the employee's average salary multiplied by so much of his total service as exceeds 10 years; or

(b) 1 percent of the employee's average salary, plus \$25, multiplied by so much of his total service as exceeds 10 years. No annuity is to exceed 80 percent of the employee's average salary exclusive of that provided by voluntary contributions.

Disability retirement

Condition for eligibility.—Retirement is permissible upon disability

after 5 years of civilian service.

Amount of benefit .- The benefit is determined by the same method as used for service retirement. The minimum annuity is 40 percent of the employee's average salary but never greater than the annuity

¹ Certain employees who have rendered 20 years of service in the investigation, apprehension, or detention of persons suspected or convicted of offenses against the criminal laws of the United States are eligible to retire after age 50 and receive an annuity of 2 percent of average salary multiplied by the number of years of

retire after age 50 and receive an annuity of 2 percent of average salary intuipheet by the atmost of year of service.

3 An additional annuity of \$36 for each year of certain specified service in Alaska or on the Isthmus of Panama is allowed officers and employees who are citizens of the United States. The annuity of a congressional employee is computed as above except that for each year of military service and service as a congressional employee, not in excess of 15 years, and for each year of Member service, the annuity is equal to 2½ percent of average salary provided he has at least 5 years of service as a congressional employee or Member or any combination of such service. The annuity of a Member of Congress or of a former Member with title to a Member annuity is computed as above except that if he has had at least 5 years of service as a Member or a congressional employee or any combination of such service, the annuity for each year of Member service and creditable military service and for each year of congressional service on to in excess of 15 years, is equal to 2½ percent of average salary: the maximum annuity is 80 percent of final salary exclusive of that provided by voluntary contributions.

he would be entitled to were his service to include the period elapsing between the date of separation and the date he attains age 60. The provision for a minimum benefit does not increase the annuity payable

to any survivor.

An individual generally may not receive retirement annuity and compensation for injury or disability to himself from the U.S. employees' compensation fund for the same period, but if eligible for both benefits must choose one or the other. However he may concurrently receive annuity and scheduled disability payments or medical services.

Deferred retirement

Condition for eligibility.—Upon separation from service after 5 or more years of civilian service, a deferred annuity is payable at age 62. A member separated with 10 years of member service may receive a deferred annuity beginning at age 60, or, with 20 years of service (including 10 years member service) may receive a deferred annuity beginning at age 50, reduced as described under "service retirement."

Amount of benefit.—The deferred annuity is computed by the same

method as the regular annuity.

An employee may elect to receive his lump-sum credit in lieu of the deferred annuity, provided separation occurs and application is filed at least 31 days before the annuity commencing date.

Lump-sum benefits

Upon separation from active service before completion of 5 years of civilian service, the employee's lump-sum credit is paid to him.

Upon death before 5 years of civilian service or after 5 years of civilian service where there is no survivor entitled to an annuity, the

employee's lump-sum credit is paid to his beneficiary.

Upon death of a retired employee before the payments of the annuity equal the lump-sum credit the difference is paid, unless there is a survivor entitled to an annuity. Upon termination of all survivor annuities before total annuity payments equal the lump sum credit. the difference is paid.

Annuities to dependents upon death in active service

Condition for eligibility.—Annuities to dependents are paid upon death of an employee in active service after 5 years of civilian service.

Amount of benefit.—(a) If survived by a widow or dependent widower, an annuity beginning after the death of the employee equal to one-half regular annuity is payable until death or remarriage of widow or widower or until the widower becomes capable of self support.

(b) If survived by a widow or widower each surviving child who received more than one-half his support from the employee shall be paid an annuity equal to the smallest of (1) 40 percent of the employee's average salary divided by the number of children, (2) \$600, or (3) \$1,800 divided by the number of children.

(c) If survived by a child or children and there is no widow or widower, each surviving child shall be paid an annuity, equal to the smallest of (1) 50 percent of the employee's average salary divided by the number of children, (2) \$720, or (3) \$2,160 divided by the number.

Upon death of the widow or widower, the annuity payable under (b) to a child or children is recomputed and paid as provided in (c)

H. Doc. 380, 87-2-

25X1X8

Approved For Release 2001/03/02 : CIA-RDP78-03721A000400010007-8 $_{4}^{\rm CIVIL~SERVICE~RETIREMENT~SYSTEM}, _{1960}$

The annuity payable to a child is terminated upon attainment of age 18, marriage, or death, whichever is earlier, except if such child is incapable of self-support by reason of mental or physical disability incurred before age 18 his annuity is terminated only upon death, marriage, or recovery from such disability.

Upon termination of the annuity of a child, the annuities to other children are recomputed as though the child whose annuity was termi-

nated had not survived the employee.

Optional benefits

At retirement a married employee may elect to receive in lieu of his or her regular annuity a reduced annuity payable during the employee's life and an annuity payable to the surviving widow or widower equal to 50 percent of as much of his regular annuity before reduction as he designated. The annuity to the survivor commences after the retired employee dies and ceases upon death or remarriage. reduction in the employee's annuity exclusive of any portion of the annuity payable on account of the minimum provisions in cases of disability retirement is 21/2 percent of so much of the regular annuity as he designated as does not exceed \$2,400, plus 10 percent of any excess over \$2,400.

At service or deferred retirement any unmarried employee in good health may elect to receive in lieu of his regular annuity a reduced annuity payable during his life and an annuity payable after his death to a survivor annuitant equal to 50 percent of such reduced annuity. The annuity payable to the employee is reduced by 10 percent of his regular annuity and by an additional 5 percent of the regular annuity for each full 5 years the person designated is younger than the retiring employee but such total reduction shall not exceed 40 percent.

Annuities to dependents upon death after retirement

Upon the death of an annuitant, benefits calculated in the same manner and payable under the same conditions as those granted upon the death of employees in active service are payable to surviving children.

CONTRIBUTIONS

By employees

Employees other than Members of Congress pay 6½ percent of salary commencing October 1, 1956. Members of Congress pay 7½ percent of salary for Member service commencing October 1, 1956.

Any employee may at his option and under regulations prescribed by the Civil Service Commission deposit additional sums in multiples of \$25 but the total amount deposited for the purchase of an additional annuity may not exceed 10 percent of the employee's basic salary for service rendered since August 1, 1920. Any contributions made by an employee after he has performed sufficient service to entitle him to the maximum annuity are applied to any deposit due and the balance is deemed to be voluntary contributions.

By government

Beginning July 1957, each employing agency must contribute amounts equal to the deductions of its employees.

While no direct appropriations are required by law,3 estimates of amounts needed to finance the fund on a "normal cost-plus-interest basis" are to be submitted.

Special appropriations are required for Public Law 85-465.

Approved For Release 2001/03/02 : CIA-RDP78-03721A000400010007-8 $_{\rm CIVIL}$ SERVICE RETIREMENT SYSTEM, 1960 $_{5}$

ESTIMATED ACTIVE MEMBERSHIP AS OF JUNE 30, 1960

The active membership of the fund as of June 30, 1960, was estimated by the Civil Service Commission to consist of 2,138,000 employees with an annual payroll of \$11,520 million.

Annuitants on the Roll as of June 30, 1960

The following table summarizes the number and amount of annuities in force on June 30, 1960, as shown by the records of annuitants maintained by the Civil Service Commission. On pages 9 to 15 of this report, the distributions of the number and annuities of annuitants on the roll as of June 30, 1960, by age are given.

¹ Includes voluntary annuities continued to survivors.

METHOD OF FINANCING PLAN

Each employee contributes 6½ percent of his compensation and each employing agency matches the contributions of its employees. The act does not specifically provide for direct appropriations by the Government but does state that "the Commission shall submit estimates of the appropriations necessary to finance the fund on a normal costplus-interest basis and to continue this act in full force and effect." Under this provision, the estimated appropriation submitted by the

Approved For Release 2001/03/02: CIA-RDP78-03721A000400010007-8 6 CIVIL SERVICE RETIREMENT SYSTEM, 1960

Commission should consist of the part of the normal contribution not met by employees' contributions and those of employing agencies, and

interest on the deficiency.

The normal contribution rate is the average percentage of the salaries of new employees that is required to be paid into the fund from the time they enter service until they leave service in order to accumulate sufficient funds to pay their benefits. Contributions at the normal contribution rate alone will not support the fund for present employees because there is an accrued liability in the fund for which no appropriations have been made, and which is referred to as the "deficiency." This deficiency arose originally when the fund was established and employees were given credit for their prior service during which no contributions had been made by the Government. This deficiency has grown during the years the fund has operated for various reasons including liberalization of benefits and inadequate contributions. If the deficiency is not to increase in the future the full normal contribution should be met and interest on the deficiency paid. Any amount needed to meet these requirements over and above the contributions provided by members and the matching contributions of the employing agencies will need to be met by Government appropriations if the fund is to be financed on the "normal cost-plusinterest basis."

Annual Appropriation of Government as of June 30, 1960

The following statement as of June 30, 1960, gives an estimate of the amount payable by the Government on the basis of the estimated payroll as of that date should it make an annual appropriation equal to the normal cost not met by the contributions of employees and employing agencies plus the interest on the deficiency.

Table II.—Total annual contributions required to support the civil service retirement system on the normal cost-plus-interest method prepared as of June 30, 1960

	Norm	al cost as	Deficien	icy cost as—	Total cost as—		
Contribution	Percent of payroll	Annual amount	Percent of payroll	Annual amount	Percent of payroll	Annual amount	
Total	13. 83	\$1,593,216,000	8. 11	\$934, 279, 000	21. 94	\$2, 527, 495, 000	
Payable by employees	6. 50	748, 800, 000			6. 50	748, 800, 000	
Payable by employing agencies Payable by Government	6. 50 . 83	748, 800, 000 95, 616, 000	8. 11	934, 279, 000	6. 50 8. 94	748, 800, 00 1, 029, 895, 00	

The normal cost to support the benefits accruing on account of current service is equivalent to 13.83 percent of payroll, which is the normal cost shown in last year's report. The employees contribute 6.50 percent toward the normal cost and the employing agencies match their employees' contributions. Therefore, there remains 0.83 percent to be appropriated by the Government to meet the normal cost. On the basis of the estimated payroll as of June 30, 1960, this represents an annual payment of \$95,616,000. In addition to the normal cost, the table shows a deficiency payment of \$934,279,000 to

7

meet the accruing interest at 3 percent on the estimated deficiency as of June 30, 1960. Therefore, the total annual appropriation needed in addition to the contributions of employees and employing agencies is \$1,029,895,000, if the fund is to be supported on the

"normal cost-plus-interest basis."

The amount of the annual deficiency payment is greater than that shown in last year's report due to the fact that during the fiscal year 1960 no direct appropriation was made by the Government and due to salary increases and expanded coverage under Public Law 86–568. As a result, the deficiency which as of June 30, 1959, was \$28,363 million has increased to approximately \$31,143 million. The increase consists of about \$1,800 million on account of salary increases and expanded coverage and the remainder on account of the unpaid interest on the deficiency at the beginning of the year, the deficiency in interest income and the part of the accruing normal cost, with interest thereon, that exceeded the contributions by employees and the employing agencies. The only direct appropriation made by the Government for the year 1961 was the amount to cover the increases and new annuities granted under Public Law 85–465 for the year 1961. This means that the deficiency next year will again be greater by the amount of the deficit in the normal contribution and the interest on the deficiency. The deficiency is therefore increasing at a rapid rate, and will continue to increase until the full normal cost is met and interest on the deficiency is paid.

Liabilities of Fund on Account of Annuitants on the Roll as of June 30, 1960

In accordance with its usual practice, the Board of Actuaries is presenting below the results of a valuation of the liabilities of the fund on account of annuitants on the roll. This valuation, prepared as of June 30, 1960, was based on the mortality tables included in the 38th annual report of the Board. A 3-percent interest rate was used.

TABLE III.—Liabilities on account of annuitants as of June 30, 1960

Group	Present value of benefits to annuitants on the roll				
4 4	Regular annuities	Voluntary annuities	Total annuities		
Retired on account of age and voluntary and involuntary separation. Retired on account of disability. Reversionary amnities to designated beneficiaries invivorship annutites in the separation of the separation	\$4, 980, 455, 000 1, 468, 081, 000 961, 042, 000 1, 157, 453, 000 8, 567, 081, 000	\$16, 044, 000 1, 621, 000 17, 665, 000	\$4, 996, 499, 000 1, 469, 702, 000 961, 042, 000 1, 157, 453, 000 8, 584, 696, 000		

¹ Includes voluntary annuities.

In the 39th annual report of the Board, the liabilities on account of annuities payable to annuitants on the roll as of June 30, 1959, were shown to be \$7,831,613,000, as compared with \$8,584,696,000 as of June 30, 1960, or an increase in liabilities of more than \$753 million during the year ended June 30, 1960.

Summary of Mortality Experience of Annuitants for the Year Ended June 30, 1960

For the purpose of making a check of the mortality tables adopted for annuitants, the actual and expected number of deaths during the past year were compared, separately for men and women who had retired on account of age, or voluntary or involuntary separation from service; and for men and women who had retired on account of disability. The following table summarizes the results of the comparison:

Table IV.—Summary of the comparison of the actual and expected deaths among annuitants July 1, 1959, to June 30, 1960

	Nu	Number of deaths				
Group	Actual	Expected	Difference	to expected cases		
Employee annuitants retired on account of age, voluntary or involuntary separation: Men. Women. Employee annuitants retired on account of disability: Men. Women.	10, 767 1, 390 4, 825 856	11, 034. 9 1, 448. 1 5, 129. 9 865. 8	+267.9 +58.1 +304.9 +9.8	0.976 .960 .941 .989		

A check of the tables used for widows was also prepared this year. The following table summarizes the comparison.

Table V.—Summary of the actual and expected terminations among female survivors of deceased employees and annuitants July 1, 1959, to June 30, 1960

d to make them	Number of terminations			Ratio of actual cases
Cause of termination	Actual	Expected	Difference	to expected cases
Death ¹	3, 235 925	8, 253. 3 829. 6	+18.3 -95.4	0. 994 1. 115

¹ Includes deaths among survivors who were granted annuities under Public Law 85-465.

The expected terminations shown in the preceding tables were based on the mortality and termination rates shown in the Board's 38th report. The actual rates of mortality among all classes of annuitants continued to be less than the expected rates. If experience during the next few years shows a similar result, more conservative mortality tables will be necessary.

Conclusions

Since the time that the Board submitted its previous report, no Since the time that the Board submitted its previous report, no fundamental changes in the financing of the fund have occurred except that the deficiency has increased from \$28,363 million as of June 30, 1959, to \$31,143 million as of June 30, 1960, which represents an increase of 9.8 percent. Therefore, the Board feels that it can only reiterate the previous recommendations with the thought that as the deficiency increases the recommendations become even more portions. deficiency increases the recommendations become even more pertinent.

These recommendations are summarized as follows. The supporting

arguments have been given in many previous reports.

(1) Direct appropriations should be made by the Government equal to the amount by which the joint contributions of employees and employing agencies fall short of meeting the normal cost, plus the amount of accruing interest on the deficiency.

(2) Actuarial valuations of the fund should be made more frequently, appropriations are being made and as a specially when insufficient appropriations are being made and as a

especially when insufficient appropriations are being made and as a result the deficiency is rapidly increasing.
